

## Safety Vac

Last Updated Thursday, 11 December 2008

Safety-Vac ® spill response technology lowers Hazmat compliance cost. The patented recovery equipment cuts disposal waste by 75%. The equipment can be used as a resource to facilitate recycling, eliminate particle absorbents, reduce production downtime and reduce labor cost. Safety-Vac products eliminate the need for spill kits and expensive Hazardous Waste disposal costs. Safety-Vac utilizes vacuum technology to provide spill recovery of flammables, combustibles, corrosives, viscous materials and biohazards. The Safety Vac product line, when used to compliment an overall environmental management strategy, will help maintain Compliance with the strictest of EPA regulations and insure Sustainability.
