**AVAILABLE
FROM TENCARVA
STOCK!**

Includes 3-Year,
No Hassle Warranty*

TEFZEL LINED CASINGS
and containment shells with carbon
fiber filled TEFZEL impellers provide
superior corrosion resistance and long
life unequalled by alloy pumps.

THE 3298 DESIGN CONCEPT is simple,
few parts and only one bolt size.
Planned maintenance is fast and easier
than other process pumps - sealed or
sealless.

Tefzel lined Mag Drive pump with Viton or PFA O rings

Close-coupled with either fabricated steel base or
Chembase Plus

Frame mounted with either cast iron base or Chembase
Plus

Carbon, Silicon Carbide or Dry Guard bearings
